

Dear parent(s)/carer(s)

As you know, our children act as Ambassadors for the different subjects. We just wanted to provide you with some up-to-date information about their role in school and some recent events that have taken place.

Last term, the Ambassadors worked with our subject Advocates at different events and then presented to some of our Governors about their experiences. We were so impressed with the way the children can talk about our Curriculum and their own experiences. Our Ambassadors have written about their experiences in the following boxes to showcase the sort of work that they have been doing.

We are in the process of refreshing and updating our subject Advocates so if this is something you would be interested in volunteering to do, please contact me at school!

Thank you for your continued support.

Mrs Evans
Assistant Headteacher
Curriculum Lead

Computing

We worked with the Computing Teacher from St Cuthbert's to create Algorithms. The session was fun and enjoyable. We learned a lot about coding and debugging. It was good to have an expert teaching us Computing. The lesson was different because it was 'unplugged'.

English

Our subject Advocates from St Cuthbert's came along to school. We showed each-other our work in English, peer assessed and talked about how we can improve our work. We found out all about English at High School and the books that they read. We thought about future career aspirations and how English would help with that chosen career. It was a useful experience to know what is coming next at High School!

Art and Design

The Ambassadors and Advocates workshop was a great experience. Our Subject Advocates are from our local community and have used their artistic talents to become tattoo artists. It was an amazing opportunity to ask the experts about their Art work and their own experiences. We had the opportunity to ask many questions and think about our own future aspirations. We loved showing them our work and also looking at the work of the experts.
